

Additional Resources – Visual Verification Tools (AI, Photos, Videos)

Category	Resource name	Organisation	Description	Links
Visual verification tools (AI, photos)	Image Whisperer	Global Investigative Journalism Network (GIJN)	Image Whisperer helps users analyse images by combining AI and visual analysis to check for signs of manipulation or inconsistency. Instead of guessing, the tool clearly indicates when an image cannot be reliably verified, encouraging cautious and informed interpretation.	https://imagewhisperer.org/ https://gijn.org/resource/guide-detecting-ai-generated-content/
Visual verification tools (photos, videos)	InVID / WeVerify	Agence France-Presse (AFP)	InVID is a verification plugin designed to help journalists and fact-checkers assess the authenticity and reliability of photos and videos shared online. It provides methods to analyse, authenticate, and detect manipulation in user-generated and social-media video content.	https://www.invid-project.eu/
Digital picture analysis (hidden manipulation in images)	Fotoforensics	FotoForensics	FotoForensics is a free, web-based digital image forensic platform that allows users to identify potential image tampering, such as manipulations or splicing.	https://fotoforensics.com/
Guidelines / Verification guides	Guidelines for newsrooms and journalists working with eyewitness media	First Draft News	A practical and simple guide for journalists on how to verify images and videos shared online, helping prevent the spread of hoaxes and misleading visual content.	https://firstdraftnews.org/articles/are-you-a-journalist-download-this-free-guide-for-verifying-photos-and-videos/
Video verification guides	Video verification step by step	Deutsche Welle (DW) Innovation	Outlines initial steps to consider when encountering a suspicious video online.	https://innovation.dw.com/articles/video-verification-step-by-step
